CAREER SUMMARY

Full-Stack Developer with 1+ year of professional experience and extensive independent, hands-on project development. Builds ERP, HMS, e-commerce, and AI-integrated applications using Next.js, React, TypeScript, Node.js, Prisma, PostgreSQL, MySQL, and MongoDB. Skilled in REST APIs, business modules, authentication and authorization, database-driven architecture, and responsive, production-ready interfaces.

WORK EXPERIENCE

Maple Service Solution Limited — Dhaka, Bangladesh May 2025 — Present
Full-Stack Developer

- Developed and maintained business modules for an ERP platform using Next.js, NestJS, Prisma, and MySQL, including sales, purchasing, inventory, expenses, and reporting workflows
- Optimized data-fetching architecture (TanStack Query + Zustand) to reduce redundant API calls and improve UI responsiveness.
- Configured global error handling in Axios and built reusable components to reduce code duplication and improve maintainability.

TECHNICAL SKILLS

Frontend: Next.js, React.js, TypeScript, JavaScript, Zustand, TanStack Query, Tailwind, CSS3, HTML

Backend : Node.js, Nest.js, Express.js

Database & ORM: MongoDB, PostgreSQL, MySQL, Prisma, Mongoose

DevOps & Tools: Git, GitHub, Docker, Firebase, Supabase, Netlify, Vercel

PROJECTS

HelloKhata (AI Powered ERP Solution) [Live Link](#)

- Developed ERP modules including Sales, Purchases, Inventory, Parties, Expenses, Quotations, Dashboard, Reports, PDF generation.
- Improved performance using TanStack Query, Zustand, reusable components, and optimized database queries.
